IMPORTANT SAFETY INFORMATION (cont.)

Before taking QULIPTA, tell your healthcare provider about all your medical conditions, including if you (cont.):

- Are pregnant or plan to become pregnant. It is not known if QULIPTA will harm your unborn baby
- Are breastfeeding or plan to breastfeed. It is not known if QULIPTA passes into your breast milk. Talk to your healthcare provider about the best way to feed your baby while taking QULIPTA

Please see additional Important Safety Information throughout and enclosed full Patient Information.

Scientifically designed to prevent migraine days

QULIPTA™ works to prevent migraine days by blocking calcitonin gene-related peptide (CGRP), one of the key proteins believed to cause migraine.

CGRP is a protein within your body

QULIPTA blocks CGRP receptors to prevent migraine days

QULIPTA[™]
(atogepant) tablets

— Few people experienced side effects

- In clinical studies, the most common side effects were constipation (6%), nausea (5%-9%), and fatigue (4%-6%).

— QULIPTA is a pill that can prevent migraine days

**No injections,
QULIPTA is a pill**

(Not actual size)
